FEATURE BREED

Fleckvieh

Fleckvieh pronounced “Fleck-vee” is the world’s only true dual purpose breed specialising in both Beef and Milk production. The breed originates from Germany and Austria and with 41 million cattle worldwide, they are the second most numerous beef breed, behind Brahman and are surprisingly the second most milked breed behind Holstein.

The Universal Breed

Fleckvieh are an efficient, highly adaptable breed that thrives in all climates of the world ranging from the deserts of Namibia to the snow covered alps.

By using different sire lines Fleckvieh can be individually tailored for beef production or dual purpose milk and beef production. The outstanding trait of the Fleckvieh cow is the top milk yield which makes them ideal as vealer mothers, ensuring high weaning weights. Because of their earlier maturity patterns Fleckvieh have the ability to reach market targets earlier than most other European breeds ensuring greater profits for the producer.

Fleckvieh for Beef Production

The breed is medium to large framed, well muscled with good length, width and depth of body. Raw data on Growth Rate, Carcase Score and Dressing percentage are used to determine the actual beef breeding value of the animal with the breed excelling in all areas from calving ease, growth rate and carcass quality. They are well known for high fertility, excellent adaptability and docile character.

Fleckvieh cross well with all breeds of cattle. Fleckvieh x Angus was the highest individual points score from 600 entries in the 2014 NSW Beef Spectacular Feedback Trial.

In Australian conditions the Fleckvieh breed boost herds with the following

- Conception rates
- Fertility
- Fat and protein
- Animal health and well being
- Added value for the sale of calves and cows
- Lower intercalving period
- No increase in calving difficulty.

CARCASE JUDGING METHOD

The National Capital Trade Steer & Heifer Hoof Competition will be judged at on Thursday 23 February 2023 followed by the National Capital Led Steer & Heifer Competition. The Competition is open to all Cattle, purebred or crossbred

Carcases will be judged using the Australian Beef Carcase Appraisal Method (ABCAM 4.3), awarding points for meeting market specifications (20 points), yield of saleable meat (40 points) and eating quality (40 points). Carcases will be judged as to their suitability for the domestic and export trade in high quality carcases and primal cuts.

Carcases will be judged against the fat specifications. Weight penalty points will be applied to carcases dressing under 180kg (at a rate of one carcase point per kg under 180kg) as these are considered to have limited market suitability.

Weight penalty points will be applied to carcases dressing over 440kg (at the rate of one carcase point per kg over 440kg) as these are considered to have limited market suitability.

AUSTRALIAN BEEF CARCASE APPRAISAL METHOD (ABCAM 4.2)

ABCAM Version 4.2 has been developed from extensive experience in carcase evaluation, and research by the Beef CRC, NSW Agriculture and Meat Standards Australia. It uses the best available carcase assessments and aims to give feedback to producers about compliance of beef carcases to market specifications, the yield of saleable meat, and the potential eating quality.
